SKILLS

- Object-oriented development
- Design patterns & software architecture
- Systems and gameplay programming
- Debugging & problem solving
- Testing & quality assurance
- Version control & code review
- AI-assisted development
- Team leadership & collaboration
- Agile & Scrum

TOOLS

- C# / Unity
- Git & GitHub
- Perforce / P4V
- Claude Code (AI tooling)
- Trello
- Figma

LANGUAGES

Swedish, native

English, fluent

INTERESTS

- Video games
- Music & bass guitar

Alfred Johansson

DEVELOPER

Developer with a strong foundation in C# and object-oriented development. Shipped a game on Steam with 25,000+ claimed copies and led a 12-person team as technical lead. Starts as Junior Frontend Developer at Hacksaw Studios in January 2027. Thrives where code quality and detail matter, and picks up new technologies quickly.

EXPERIENCE

2027 from Jan
Junior Frontend Developer
Hacksaw Studios · Stockholm

2026 Jun to Aug
QA Intern
Odd Raven Studios · Stockholm

- Caught critical issues early, including a softlock in the dialogue system, by playtesting an unannounced title in structured daily sessions with clear repro steps and recorded playthroughs.
- Simplified prioritization for the dev leads by reworking the studio's reporting flow into a tagged, filterable format and writing bug reports with proposed solutions.
- Onboarded independently through internal documentation: a new version control system, naming conventions and a professional pipeline.

2025 to 2026
Vice Chair, student association
LVL · Södertörn University game development association

- Coordinated 15+ events for game development students by leading the team and owning communication with external partners.
- Introduced around 30 students to game development by designing and running hands-on workshops.

2021 to 2023
Data Analyst & Research Assistant
Foodfacts Sweden · Remote

- Delivered data analysis fully remotely, with strong self-management, accuracy and clear written communication.

DEVELOPMENT PROJECTS

2025 Steam
Murmurs of the Mist · Lead designer & programmer
JamJam Studios · narrative-driven horror puzzle game

- Shipped a narrative-driven horror puzzle game on Steam with 25,000+ claimed copies by leading programming and design from first prototype to release in an 11-person team.
- Owned the technical foundation as CTO: architecture decisions, version control (Perforce) and build pipeline.

2026 paused
Pizza to Hell · Technical lead & designer
Pizza to Hell HB · co-founded studio · vertical slice

- Led a 12-person team as work lead: set the workflow, ran sync meetings and kept the systems modular and integration-ready.
- Built the finisher system from scratch with clean integration between team-owned modules, plus an event-driven footstep system.

2026 solo
Harpoon · Solo project

- Built the player controller and enemy AI with custom A* navigation and surface-crawling movement in Unity 6.

EDUCATION

2023 to 2026
Bachelor's degree in Media Technology
Södertörn University · specialization in game development, design and scripting

2020 to 2023
Upper secondary diploma, Technology program
LBS Kreativa Gymnasiet
